

Energy Star and Active Safety

Active Safety is a partner in the ENERGY STAR program for exit signs. Series 2002 and 2001 photoluminescent exit signs are approved and listed.

About ENERGY STAR

ENERGY STAR is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy that identifies products that protect the environment by being energy efficient.

Exit Signs and ENERGY STAR

Exit signs listed with ENERGY STAR operate on 5 watts or less of electricity per sign. ENERGY STAR exit signs are also tested per UL 924 for visibility factors and come with a five-year warranty

When installed throughout a building, exit signs listed with ENERGY STAR can save hundreds or even thousands of dollars in power and maintenance costs compared to incandecent or compact florescent exit signs.
